The invention of the "camper car" – a love story!

As a junior manager in his father's whip and bridle factory, Arist Dethleffs was often away on business trips for weeks on end. He missed his family so much during these times that he promptly invented the "camper car" in 1931 – the first caravan in Germany. This devoted family man thus not only invented, but then also pioneered a completely new form of travel, which remains extremely popular today.

The Dethleffs family and their vehicle/ trailer combination aroused curiosity and interest wherever they went. And so Arist soon began returning from his travels with orders for camper cars, which he manufactured in a small garage on the company premises.

The startup quickly picked up speed and left the small garage to become a separate division that focused exclusively on building caravans. Caravanning soon established itself as an entire movement in its own right.

All possible comfort

AirPlus ventilates the overhead lockers and thus prevents the formation of condensation

Wherever warm air cools quickly, moisture is generated – in a caravan, this primarily occurs on the exterior walls during very cold weather. The AirPlus system provides rear ventilation for the overhead lockers, which helps the air to circulate inside the caravan and prevents condensation from the outset. The result is healthy room air without mildew formation or mould spots.

Your home on wheels needs to provide the same comfort level as your home. Restful nights are guaranteed thanks to the Dethleffs SleepWell system.

With flexible slat frames and ergonomic 7-zone mattresses you will sleep like on air

Online you will find more information about the Dethleffs SleepWell system. Simply visit: **www.dethleffs.com**
