More information on pg. 50 or at:

What makes our products special? The sum of many details.

WEINSBERG DNA. Sounds powerful. It is. Thanks to the passion and experience of our employees (many of them enthusiastic campers themselves) we know what is important “out there”. That is why we pour our expertise into all WEINSBERG models, from the smallest screw to the largest storage space. While expertise is not something you can always see, it is something you can always feel.

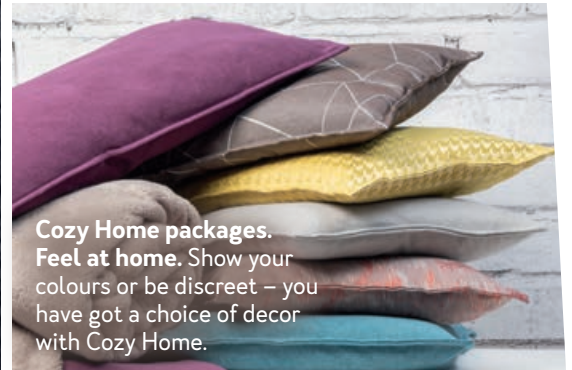

COMFORT AND HEALTH.

Fabrics make a significant contribution to the ambience. At WEINSBERG, fabrics are not only of high quality and perfectly processed, but also have that certain something in terms of design.

Dinette bench.

The new seat cushions come with a comfort function and an increased seat depth.

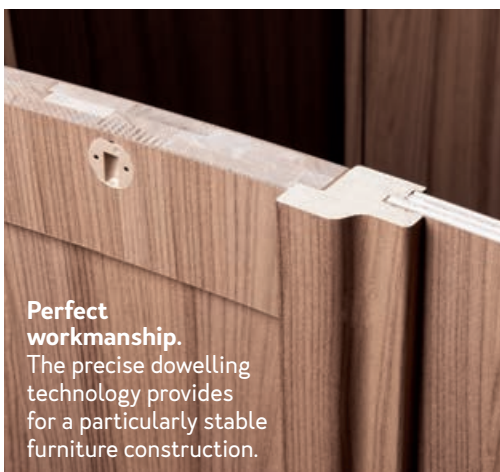

Cozy Home packages.

Feel at home. Show your colours or be discreet – you have got a choice of decor with Cozy Home.

Rail system. Our ceiling cupboards have a continuous rail system for an increased torsional rigidity.

Perfect workmanship. The precise dowelling technology provides for a particularly stable furniture construction.

FURNITURE MAKING AND QUALITY.

Full-body construction including back panels. There is a decisive quality criterion in every WEINSBERG: craftsmanship, longevity and long lasting pleasure.

GRP roof and skylight with LFI technology. The high-strength GRP roof is hail-resistant and can withstand all weathers. The insulated skylight is produced using a LFI process. It is UV-resistant and easy to repair.

PERFECT VEHICLE CONSTRUCTION AND LONGEVITY.

We build on security. After all, the future owners should always feel well looked after in our caravans. And that for many years to come.

Sandwich construction. The multi-layer structure with its integral insulation and more contact surface on the body floor provide greater stability and insulation.

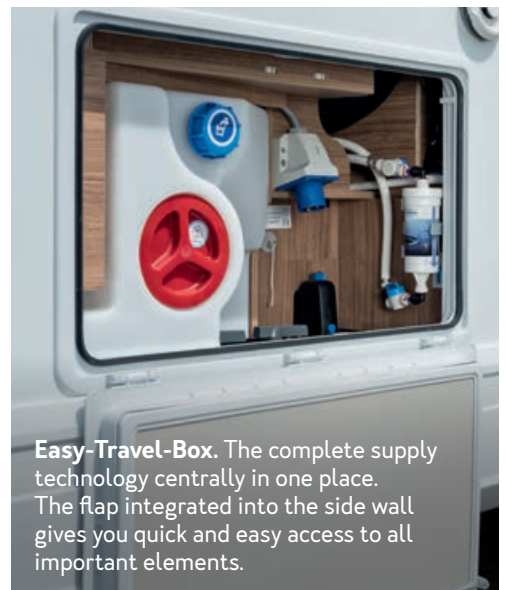

VEHICLE TECHNOLOGY AND SUPPLY.

We strive for the best possible travel experience for our customers. That is why we are extremely careful when selecting our partners and only use what really convinces us. The bluuwater water filter for hygienically clean water is one such example.

TRUMA iNet X and centrally arranged LED control panel. One glance is enough to check the water level and the electronics supply.

Easy-Travel-Box. The complete supply technology centrally in one place. The flap integrated into the side wall gives you quick and easy access to all important elements.

Information on the product delivered, dimensions, mass and appearance, correspond to our understanding at the time of printing (07/2023). We reserve the right to make changes to fittings, technical data, series equipment and prices. Please make every effort to be fully informed about these matters by your authorised WEINSBERG dealer before making your purchase. After a contract has been concluded, we reserve the right to make technical changes within the framework of the construction insofar as they serve technical progress and are acceptable for the customer. Minor colour and texture deviations are also reserved – even after conclusion of the contract – insofar as these cannot be avoided due to the material structure (e.g. colour deviations of up to approx. 2.0 dE between paint on sheet metal and paint on GRP/plastic) and are reasonable for the customer. Some of the illustrations show equipment features that are not included in the standard equipment and that can be ordered for an additional charge (optional equipment) as well as some equipment features of prototypes/studies that do not correspond to the standard equipment and therefore cannot be ordered as optional equipment. Slight colour deviations of the illustrations in the brochure from the actual vehicle cannot be completely excluded for printing reasons. Therefore, before purchasing a vehicle, please seek comprehensive advice on the current status of the series from an authorised WEINSBERG dealer. The decoration shown in the catalogue is not part of the equipment supplied. Please also note the comments in the current price list, in particular on weights, load capacities and tolerances. Please note that the number of beds indicated may include beds for both adults and children. The beds do not have the same dimensions. We therefore recommend that you consult your WEINSBERG dealer about the dimensions of the beds provided in the vehicle so that you can decide whether they are suitable for the occupancy (adults/children) you intend to have. For some models, additional equipment must be selected in order to achieve the maximum possible beds. Your WEINSBERG dealer will be happy to advise you. Reprinting, even in extracts, is only permitted with the prior written permission of Knaus Tabbert AG. We reserve the right to change content at our discretion.
